PROFILE

I am actively seeking an opportunity to work as a web developer and I am eager to secure my first position in this field. I bring a diverse set of skills to the table, including proficiency in web technologies such as HTML, CSS, JavaScript, and web frameworks. Additionally, I possess a strong foundation in computer science and programming principles. My passion for technology, problem-solving abilities, and commitment to learning make me a promising candidate for a web development role. I am enthusiastic about contributing to dynamic projects and building a successful career in web development.

EDUCATION

Bachelor of Law
Helwan University

PROJECTS

Elzero Website [🔗](#)

Personal Project

Built with: HTML, CSS

Developed a web-based training platform using HTML and CSS, offering educational content, tutorials, and hands-on exercises in web development, including HTML, CSS, and more. Aimed at aspiring web developers, the platform facilitates interactive learning and practical experience with the potential inclusion of a code editor.

Advice generator app [🔗](#)

Frontend Mentor

Built with (HTML - CSS - JavaScript)

"Frontend Mentor - Advice Generator App" is a UI development project for an advice-providing app. It entails designing and building the UI using web technologies like HTML, CSS, and JavaScript. The app displays random advice and responds to user interactions, possibly including interactive features like a button for fetching new advice or sharing advice on social media.

Tip calculator app solution [🔗](#)

Frontend Mentor

Built with (HTML - CSS - JavaScript)

Created a web-based tip calculator app using HTML, CSS, and JavaScript, allowing users to input bill amounts, select tip percentages, and specify the number of people splitting the bill. The app calculates tip and total amounts per person. Demonstrates skills in frontend web development and UI design.
